E. STUDENT AFFAIRS  
Dr. Mary B. Coburn, Vice President for Student Affairs

Dr. Coburn provided an update on three areas in Student Affairs:

**Housing:** Currently, 75% of all freshmen live on campus; this will increase to 80% with the completion of Dorman and Deviney halls. Studies show that students who live on campus are more successful, e.g., they are more involved in student organizations, have higher GPAs and the retention rate at the end of the first year is 93% for students who live on campus as opposed to 89% for students who live off campus. Data shows a high satisfaction rate with Housing’s programming and facilities.

**Graduating Senior Survey:** The response rate to the graduating senior survey is approximately 95%. Of those who responded, 56% are seeking employment, 50% have one or more job offers, 70% of those received offers in careers related to their majors and 25% plan to attend graduate school. Remaining respondents either have not looked for employment, are volunteering, have committed to family obligations or are entering the military. 37% of respondents indicated they had received assistance from the Busch-Transou Career Center. 2,212 students indicate they plan to remain in Florida.

**Garnet and Gold Scholar Society:** 81 students were inducted last year and approximately 400 students are in the program. There are over 100 faculty and staff advisors assisting these students. Those who complete the program report 2-3 times more service hours than those who do not participate.

F. OFFICE OF RESEARCH UPDATE  
Dr. Gary K. Ostrander, Vice President for Research

Dr. Ostrander updated the Trustees on proposal and award statistics. When comparing 2008 and 2012, the number of proposals submitted is stable, the number of awards has declined but the average dollar amount per award has increased. When third quarter data for 2012 is compared to 2013, the total amount awarded during 2013 is about $7 million higher (approximately $145 million in 2012 compared to $152 million in 2013).

The sixty year trend in Federal extramural non defense research and development funding by function was reviewed. The data shows a large increase in funding for health when compared to other functions such as energy, space and general science. This could be an indication that additional funding may be available to faculty in biology, chemistry, magnet lab, and engineering.
